

Getting Started

Reference Documentation

For further reference, please consider the following sections:

- [Official Apache Maven documentation](#)
- [Spring Boot Maven Plugin Reference Guide](#)
- [Create an OCI image](#)
- [Spring Boot DevTools](#)
- [Spring Web](#)
- [Spring Data R2DBC](#)
- [Spring Boot Actuator](#)

Guides

The following guides illustrate how to use some features concretely:

- [Building a RESTful Web Service](#)
- [Serving Web Content with Spring MVC](#)
- [Building REST services with Spring](#)
- [Accessing data with R2DBC](#)
- [Building a RESTful Web Service with Spring Boot Actuator](#)

Additional Links

These additional references should also help you:

- [R2DBC Homepage](#)

Maven Parent overrides

Due to Maven's design, elements are inherited from the parent POM to the project POM. While most of the inheritance is fine, it also inherits unwanted elements like `<license>` and `<developers>` from the parent. To prevent this, the project POM contains empty overrides for these elements. If you manually switch to a different parent and actually want the inheritance, you need to remove those overrides.
